

RODIM Premium Disc Vortex-61

Published: 09.08.2017
 Latest update: 09.08.2017

SANDING

- **Application:** machine and manual, dry and wet sanding of Metal, Plastic, Polyester Body-Filler, Filler, Clear-coat, Paints in general, Resins, Wood.
- **Mineral:** special enforced Aluminium Oxide
- **Resin:** Double layer of Polymerized Phenolic water-borne resin.
- **Stearate:** special hybrid.
- **Backing:** Polyester film.

Remarks

- Hi aggressiveness together with fine refinish performances.
- Fully compatible with standard 6-7-15-21 holes back-up pads.
- Powerful anti-clogging and dust vacuum.
- Very long lasting with constant cut and anti-clogging.
- Anti-breakage film backing.

RODIM Premium Disc Vortex-61

SANDING

RODIM Premium Vortex-61 has been studied to offer a unique balance between advanced aggressiveness and fine refinish, with the perfect dust vacuum of our powerful unique Vortex-61 suction system.

Anti-Clogging

Thanks to the new chemistry applied in the stearate, RODIM Premium Vortex-61 works long time with no clogging. This element warrants long lasting and perfect refinishing quality.

Duration

The plastic backing allows to never brake the disc in the panels' edges. The special enforced synthetic Aluminium Oxide is very hard and warrants very long last on all materials.

Refinishing

RODIM Premium Vortex-61 has been studied to offer the best balance between refinish quality and aggressiveness. In all grits the refinishing is fine and well homogeneous. This allows the application of different working cycles depending on the operator uses, with full warranty of final refinish result.

Aggressiveness

The aggressiveness has been improved thank to a new chemistry for the special enforcement of the mineral. The grit keeps all the advantages of the corundum (white aluminium oxide), which are duration and refinishing, and in the same time the advantages of the brown aluminium oxide (high cutting properties). Thank to this, when after few seconds sanding the "traditional" abrasives start losing cutting power, RODIM Premium Vortex-61 goes on working for longer time with constant grip on the sanded material.
